

Acril Convex Mirrors - Superior Quality - Superior Design

## General Purpose Convex Inspection Mirrors

### Portable Inspection Mirrors

Portable inspection mirrors are invaluable for looking into hard to see places and are ideal for all applications from general observation to searching in high security areas. Use wherever direct observation is not possible. The mirror is supplied complete with a steel, powder-coated 1 metre long arm which folds down for neat storage. (Fixed length arms also available)

Inspection mirrors are available in either glass or impact resistant acrylic mirror in both 150mm and 230mm sizes. Lightweight but sturdy fittings make using the inspections mirrors simple to use and the adjustable mirror head permits access to the most difficult of areas. Inspection mirrors can view underneath, on top or around objects and inside small areas. Used by enforcement agencies, engineering, building maintenance, armed services and security guards.

- Wide angle convex mirror - 150 or 230mm diameter
- Handle extends to 1 metre and folds down for neat storage or optional fixed length handle available
- Glass or impact resistant acrylic face
- Torch mount available
- Strong lightweight construction

Over 600 supplied for  
the 2000 Olympics!

### 'Look under' Vehicle Inspection Mirrors

Used for detecting contraband, bombs and smuggled goods under cars, trucks and other vehicles. The 'look-under' mirror is available in glass or impact resistant acrylic and is fitted with a 45cm diameter mirror. The base is fitted with castors and the observer simply wheels the mirror into position allowing easy access to the underside of the vehicle.

- 45cm wide angle convex mirror
- Glass or impact resistant acrylic face
- Castors facilitate movement under the vehicle
- Handle folds down for neat storage
- Torch mount available

As used by the Royal Australian  
Army anti-terrorist units for the  
Sydney 2000 Olympics.
