

Acril Convex Mirrors are ideal for any area where an unobstructed view is required. We provide a comprehensive range of quality convex mirrors for every application. A bright non-fading mirror image gives clear, distortion free views around corners, over aisles, blind spots, passageways and intersections. Designed for quick and simple installation all our mirrors are fully adjustable and supplied with extra strong 'no nonsense' fittings. Available in a variety of models and sizes ranging from 300MM up to 1200MM in diameter, choose from standard shatterproof acrylic, unbreakable polycarbonate or stainless steel (*dependent on application*). Used widely for all security, safety and traffic applications convex mirrors are the most economical and practical method for eliminating blind spots or where direct observation is not practical. This brochure contains information on our standard mirrors but we also provide inspection mirrors, swimming pool mirrors, concave mirrors and lots more. If you are not sure as to the best mirror for your application, please speak to your authorised distributor.

Indoor Convex Mirrors

General Purpose , Light Weight Convex Mirrors

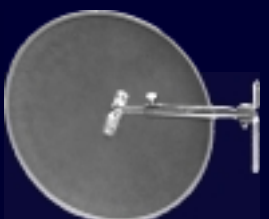

A general purpose lightweight mirror for indoor use only. Used extensively in retail stores and office applications, this low cost mirror is simple to fit and adjust. Supplied with a fully adjustable arm and non-slip fittings for maximum versatility. Lightweight design permits fitting to walls, suspended ceilings, pelmets etc.

Retail Outlets - Convenient Stores - Supermarkets - Offices - Hospitals

- Acrylic convex mirror
- Fully adjustable in all directions
- Quality all metal non-slip fittings
- No plastic or stick-on components
- Light-weight design
- Simple installation

Order Code: ECO.300 ECO.450 ECO.600 ECO.760 ECO.6040

General Purpose , Heavy Duty Convex Mirrors

A general purpose light industrial convex mirror for all indoor and undercover applications. A fully framed mirror complete with hardboard back and adjustable arm is suitable for applications where a robust mirror is required.

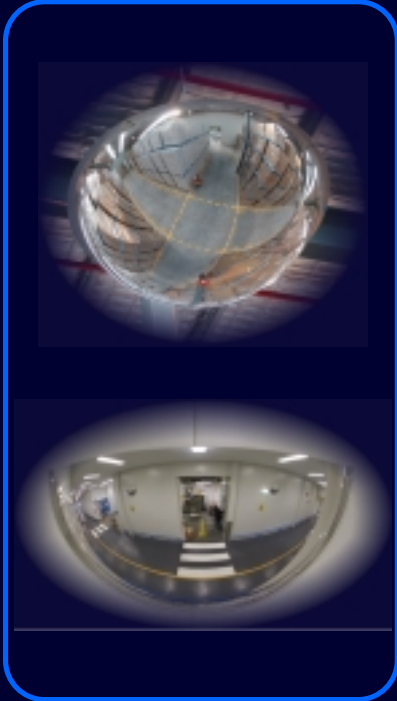

Warehouses - Conveyors - Hoppers - Car Parks - Forklift Traffic

- Acrylic convex mirror
- Fully adjustable in all directions
- Zinc plated fittings
- Double clamping action
- Fully framed
- Internal reinforcing plate
- Simple installation

Order Code: INT.300 INT.450 INT.600 INT.760

Indoor Dome Mirrors

General Purpose, Domes, Half Domes & Quarter Domes

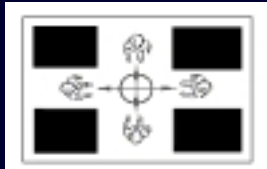

Full domes provide all round 360 degree coverage of an area but due to the curvature, the mirror needs to be reasonably large to maintain definition. Use the 45 or 60CM mirror for office type intersections and the 60 or 90CM mirror for larger areas typically found in warehouses, retail stores etc. A single dome provides the same coverage as four convex mirrors and is a very cost effective way of protecting an intersection. Half dome 180 degree mirrors are used for T type intersections and are widely used in accident prevention in passages. They also provide vision directly beneath the mirror which is advantageous in some applications. Use the larger half dome mirrors in warehouse aisles that end in a T type intersection. Quarter dome mirrors provide observation around blind corners and give a much larger field of view than a standard convex mirror but generally have limited application restricting them for use in confined areas. They should only be used where a standard convex mirror is deemed to be unsuitable. The range of dome type acrylic mirrors are made for standard general purpose applications and for high security applications, our range of unbreakable polycarbonate dome mirrors are recommended (see below).

(Quarter Dome Mirrors)

Hi-Security Unbreakable Polycarbonate Mirrors

Constructed from unbreakable polycarbonate and supplied with captive powder coated frames, the mirrors are available in three basic types; for corner, mid-wall and ceiling mount. All three types have rebated mounting holes and smooth flanges to eliminate lynch points. This range of mirrors have been designed primarily for use with correctional facilities and other high risk applications. For standard applications use the acrylic version (see above) The mirror is used to observe the entire cell and occupants from outside the cell enclosure thereby protecting staff entering the cell from surprise attack and permitting the supervision of the occupants at all times. Acril Convex polycarbonate cell mirrors have set the industry standard where an uninterrupted view of the cell is required. Each type carries an Australian Registered Design Number. By quoting the design number you are guaranteed that the product is manufactured to original standards and is not an inferior copy. For more details contact us direct.

Outdoor Convex Mirrors

Indoor/Outdoor Heavy Duty Convex Mirrors

A general purpose industrial quality convex mirror for all applications. The heavy duty weather-proof design guarantees that the mirror will provide many years of maintenance free service. Adjusts in all directions but rigid once set. Zinc plated D-Bracket is super strong and holds mirror firm in all conditions. Mounts on any flat surface or can be adapted for post mounting.

Factories - Warehouses - Fork lift safety - Car parks - Roadways

- **Grey PVC outer surround**
- **All metal fittings zinc plated**
- **Acrylic mirror face**
- **Doubled sealed against moisture**
- **Fully adjustable captive D type bracket**
- **Bracket suitable for wall or post mount**

The mirror mounts to any flat surface or adapts to a 60MM diameter post using the optional 60MM U-Bolt Kit . Alternatively use our wrap type post clamp for 60 or 75MM posts as supplied for our traffic mirror series.

Order Code: EXT.300 EXT.450 EXT.600 EXT.760 EXT.900 EXT.1200

Traffic Mirrors, Heavy Duty Convex Mirrors

A highly visible heavy duty mirror for all outdoor applications. This heavy duty convex mirror is designed specifically for traffic situations. The all metal frame is zinc plated and powder coated and is fitted with a reduced curvature convex mirror for maximum definition. Specify acrylic, or unbreakable stainless steel mirror to suit your particular requirements.

Traffic Applications - Roads - Car parks - Factories - Public areas - Mining

- **Large range of sizes to choose from**
- **Acrylic or stainless steel mirror face**
- **Double sealed against moisture**
- **Post mount standard or wall bracket available**
- **Optimised curvature for maximum definition**
- **Powder coated for maximum protection**
- **All steel frame and visor**

Note: 60CM mirrors are fitted with a 60MM wrap type post clamp as standard and larger mirrors are fitted with a 75MM post clamp but they can be supplied with either clamp on request. Optional wall bracket available.
